Every puzzle in this book was generated by original software written for Puzzle Press and was checked by a separate computer program before printing: each word search, sudoku, maze and word scramble has exactly one correct answer, and each cryptogram decodes exactly to its sourced public-domain quotation. Every answer is in the back of the book.

Word lists, instructions and design were created by Tyasi LLC with the help of AI tools. No AI-generated pictures are used.

Quotations are taken from public-domain works first published before 1929; each answer lists its author and source.

BEFORE YOU BEGIN

How to Play

Word Search

Find every word from the list hidden in the grid. Words run in a straight line - across, down, diagonally, and sometimes backwards. Circle each word in the grid and tick it off the list. Spaces in names are left out.

Sudoku

Fill every empty square with a number from 1 to 9 so that each row, each column and each of the nine 3 x 3 boxes contains every number exactly once. No math is needed - it is a logic puzzle. Each puzzle has exactly one solution and can be solved without guessing.

Cryptograms

Each quotation is written in a simple code: every letter has been swapped for a different letter, and the same code letter always stands for the same real letter. Two hints are filled in for you. Use short words, repeated letters and the code tracker to crack the rest.

Mazes

Start at START and draw a path to FINISH without crossing any lines. There is only one way through! The mazes get bigger and trickier as you go. Use a pencil so you can erase.

Word Scrambles

The letters of each word have been mixed up. Put them back in order to spell a word that fits the page's theme. Every scramble has only one correct answer.
